## AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

### Listing of Claims:

Claim 1. (cancelled)

Claim 2. (currently amended) The airbag fabric of claim ± 11, wherein said crystalline and amorphous particles consist of incombustible, inorganic material.

Claim 3. (currently amended) The airbag fabric of claim ± 11, wherein said crystalline and amorphous particles consist of cation-active silica.

Claim 4. (currently amended) The airbag fabric of claim ± 11, wherein said particles are particles of colloidal silicic acid (colloidal silica).

Claim 5. (currently amended) The airbag fabric of claim ± 11, wherein at least one of said warp and weft threads are made of polyamide.

Claim 6. (currently amended) The airbag fabric of claim ± 11, wherein at least one of said warp and weft threads are made of polyester.

Claim 7. (currently amended) The airbag fabric of claim ± 11, wherein at least one of said warp and weft threads are made of textured yarn.

Claim 8. (currently amended) The airbag fabric of claim ± 11, wherein said fabric, prior to said incorporation of at least one of crystalline and amorphous particles, is an uncoated flat fabric.

Claim 9. The airbag fabric of claim ± 11, wherein said fabric is a two-layered double fabric that is partially sewn or woven together.

Claim 10. (cancelled)

Claim 11. (currently amended) An airbag fabric comprising intersecting warp and weft threads made of at least one of synthetic fibers and filaments and woven at such a density that openings remaining between their intersections yield an at least microporous structure in said fabric, wherein at least one of crystalline and amorphous particles are incorporated in at least some of said openings,

said fabric having a coating or finish of polymeric material that has been applied after said incorporation of at least one of crystalline and amorphous particles,

~~the airbag fabric of claim 10, wherein~~ said coating or finish ~~consists~~ consisting of or comprising a silicone.

Claim 12. (currently amended) An airbag fabric comprising intersecting warp and weft threads made of at least one of synthetic fibers and filaments and woven at such a density that openings remaining between their intersections yield an at least microporous structure in said fabric, wherein at

least one of crystalline and amorphous particles are  
incorporated in at least some of said openings,

~~The airbag fabric of claim 1, wherein a static~~  
friction at the intersections between the warp and weft  
threads ~~is~~ being present that is at least 5% greater than that  
of an untreated fabric having the same construction.

Claims 13-18 (cancelled)

Claim 19. (currently amended) The airbag fabric of claim  
± 11, wherein said airbag fabric forms part of a vehicle  
occupant restraint system.

Claim 20. (currently amended) The airbag fabric of claim  
± 11, wherein said airbag fabric forms part of a side-impact  
airbag.
